

Method to convert  
the numeric values  
into bins

```
data['binned_col'] = pd.cut(data['numeric_column'],  
                             bins=[low_val, first_range, second_range, Last_val],  
                             labels=['first_label', 'second_label', 'third_label'],  
                             include_lowest=True)  
  
data.head()
```
