

variable that stores
the output of cross
tabulation analysis

```
plt.figure(figsize=(value_width, value_height))
```

```
cross_tab.plot(kind='bar', stacked=False)
```

```
plt.title('The title of the graph')
```

```
plt.xlabel('The label of the x-axis')
```

```
plt.ylabel('The label of the y-axis')
```

```
plt.show()
```

```
sns.countplot(x='cat_col_1', hue='cat_col_2', data=data)
```

categorical column of which
we want to perform the
frequency analysis

categorical column which will
create the stack or cluster within
the graph

variable that stores the
entire dataset
